Counseling Psychology (Ph.D.)
Internship

Internship Placements

Our students are very successful in obtaining high quality internship sites (see placement statistics below). Students typically obtain full-time, paid positions in APA approved internship sites. Preparation for internship application and placement begins in the first year of the program and is ongoing throughout the program. The Director of Training coordinates meetings with students in each academic year that provide information and guidance in choosing practicum outplacements, coursework, assistantship opportunities, and volunteer activities that enhance students’ qualifications for obtaining the internship sites they desire.

Students obtain internship positions in local sites and in many places throughout the country, depending on the students’ career and lifestyle plans. The following is a partial listing of the internship sites that students have obtained:
